Insurance agents that know manufacturing

Our individual approach, and detailed needs assessment process will help us identify the right coverages for your exposures. With lots of experience in the manufacturing industry we are ready to jump right in and help you get the best coverage. We realize your business is always changing and it is difficult to keep up with all of the exposures. We keep a close eye on your industry and work with carriers that have programs specifically tailored for manufacturing companies. Our carriers closely follow the changing industry trends to ensure they have a best-in-class program that's on the cutting edge.

Our claims adjusters for this program are experienced and work exclusively with manufacturing companies. They are usually local and they know how to get you back on your feet quickly.

Most manufacturing companies are eligible for 3 year policies for General Liability and Property policies. The advantage to you is less paperwork and the rates are locked in for up to 3 years! Give us a chance to show you how we can help protect your business.

What can we offer?

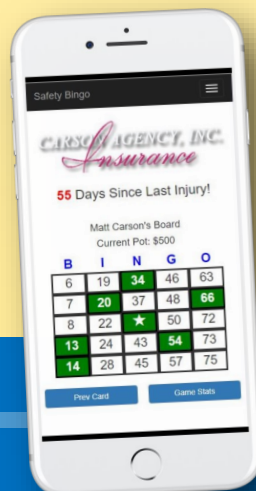

- Claims adjusters that work exclusively in the manufacturing industry
- 3 year policies with rates that do not increase within the term
- Contract penalty coverage of up to \$10,000 for untimely delivery of products due to a covered loss
- Up to \$100,000 of coverage for your loss of income when your operations are suspended due to a direct loss to a dependent property
- Up to \$35,000 of coverage for theft of personal effects, including employees' tools used in your business
- Equipment Breakdown coverage included in basic policy
- Commercial Umbrella available with higher limits to cover catastrophic losses
- Manufacturer's Errors and Omissions available with up to \$1,000,000 limits

Helping to control your risk

Our primary goal is to prevent bad things from happening to you and your business by helping you manage your risks. We can help you by providing the following services

- Loss control inspections
- Advice on effective hiring practices
- Workers' Safety consultation
- Crisis response planning
- Physical hazards

Encouraging safety

We recently developed an app to help encourage safety for our clients and their businesses. Our "Safety Bingo" app is available to enroll in and make safety a top priority among you and your employees. Everyday a number is drawn, but if an injury occurs, the boards are cleared! Each employee receives a unique link to keep track of their progress. Ask us for more information!
